Re: KPDES No.: KY0087823

Mr. William Shane:
Division of Water, Surface Water Permits Branch
200 Fair Oaks Lane
Frankfort, Kentucky 40601 (Ph-502/564-3410 Fax-502/564-9636)

Dear Mr. Shane:

I have received your letter dated 5 Dec. 2008 in which you instructed me to either conduct further sampling; the results to be submitted for inclusion in our Application for renewal of our KPDES Permit.

You also indicated that if the sampling could not be completed at this time I should submit a letter explaining just why it is not possible at this time.

Please note the following:

Plant no 1: is closed since Oct. of 08, and will not be reopened until April 1st of 09.

Plant no 2 & 3 are barely running, We have a discharge rate of less than 250 gallons per day since Oct of 08. This will continue until 1 April when our season usually gets under way full swing.

With all the above considered it is my request to forestall the analysis requested until mid April 09. This will allow for testing all three units at the same time, and of course provide an analysis of the three plants operating under normal load.

I trust this request meets your requirements. If anything further is required please advise.

Lawrence E. Hellkamp
